EDUCATION

Singapore University of Technology and Design (SUTD)

BEng in Computer Science & Design

- Major in Software Engineering

Singapore

Sep 24 - Present

Nanyang Polytechnic

Diploma in Digital Game Art & Design

- Specialisation in 3D
- Nominated in the SEA games award 2023 with final year project "Asleep in the deep"

Singapore

Mar 20 - Apr 23

WORK EXPERIENCE

Continental Automotives Singapore

Aug 22 - Oct 22

German multinational automotive parts manufacturing company, 3D Artist

Singapore

- Developed over 20 game-ready 3D models using Blender and Substance Painter, collaborating with project leads to ensure all assets met performance and stylistic requirements
- Engineered high-fidelity 3D assets and companion robots across 2 VR showroom projects, directly improving user interaction
- Optimized 3D assets and ensured seamless VR integration in collaboration with a game developer. Created a interactive showroom and 3D robot companion to enhance user experience and immersion
- Spearheaded brainstorming sessions to design creative and technical interface solutions for virtual car and robot simulations
- Analyzed client data, feedback and design specifications, contributing to innovative solutions in interactive 3D VR technologies

ORB-E

Feb 25 - Feb 26

AI-enabled modular robot, Head of Marketing & Design

Singapore

- Secured a \$6,000 startup grant (Baby Shark Fund) by pitching prototype's technical viability and commercial potential for hazardous waste recovery
- Bridged gap between engineering and business objectives, ensuring prototype's development (spotlights, maneuverability) directly aligned with identified market demands and user needs
- Directed user-centered design and deployment of a compact, tethered robotics system built to navigate highly cluttered environments
- Positioned complex technical features, including AI vision and high-decibel audio modules, into a clear go-to-market narrative focused on remote material detection and safety

Maibel

Dec 25 - Jan 26

Emotionally intelligent AI wellness companion for women, Experience & Missions Design Intern

- Designed intuitive user onboarding flows and interactive, sticker-based feedback systems, lowering entry barriers and enhancing user engagement during critical initial interactions
- Gamified core user experience by embedding narrative lore into structured wellness missions, shifting user behavior from passive tracking to active, long-term relationship building
- Spearheaded user experience audits and iterative playtesting cycles, isolating and resolving critical conversation retention issues to optimize emotional continuity

EXTRACURRICULAR ACTIVITIES

Student Government - ROOT

Singapore

Senior Director of Media & Marketing

Mar 25 - Present

- Improved university outreach and interconnection with social media
- Designed promotional materials and managed announcements to market school events, creating posters and engaging media content
- Strengthened university outreach and engagement by optimizing social media strategies and content

Unreal Enthusiast Interest Group

Singapore

President

Mar 25 - Mar 26

- Organized and facilitated weekly sessions for members to collaborate on projects, increase technical skills, and share industry insights
- Promoted Unreal Engine adoption through workshops, tutorials, and hands-on projects, increasing student engagement and proficiency
- Built a supportive environment for aspiring game developers, 3D artists, and tech enthusiasts to learn and grow together

TECHNICAL SKILLS

Programming Languages

- Python | JAVA | C# | JavaScript

Software Knowledge

- Technical: Adobe Suite (Photoshop, InDesign, Illustrator, XD, After Effects, Substance Painter), Autodesk (Fusion, Maya, Motion builder), Figma, Blender, Microsoft Office Suite (Word, PowerPoint, and Excel)
